

## **Science club report 2019-20**

The science club of Siddhabhoomi International School aims at the world technological advancement. The club was inaugurated by our school director Er. R.B. Singh and he gave a lecture on the importance of such clubs.

The school holds importance of such clubs and urges its student to be a part of such co-curricular activities commented by principal.

Activities on science club were.....

1. Earthquake experiment
2. paper spinners
3. density jar
4. viscosity races
5. egg Drop experiment
6. blow up a balloon with Alka seltzer

In this simple experiment students has taken part and enjoyed while doing so at the end of the activities they have shown the the results to their in-charge teachers and it was a memorable day and it is very easy also by doing and learning it was very interesting for the students. They understood the values of activities and practical in science and how they can learn and understand easily with the help of such activities it was very helpful for the students to understand the fact behind the object and experiments.
